## EXPERIENCE

### Fullstack Software Engineer

Emjay Information Technology(via codementor), Lagos, Jun. 2021 – present

- Successfully completed over 1500 coding sessions for various clients, ranging from startups to established businesses.
- Collaborated closely with clients to collect requirements, provide technical direction, and ensure project objectives were met within the specified time frame.
- Delivered maintainable solutions by utilizing best practices such as version control, code reviews, and testing.
- Participated in team meetings to exchange ideas, learn, and enhance development processes.

### Fullstack Software Engineer

UNPLUGDD, Lagos. Apr. 2019 – Jun. 2021

- Developed a user-friendly and lightning-fast user interface.
- Helped backend engineers understand frontend components, their purpose, and how to integrate them best.
- I helped integrate a messaging system that lets people chat while watching live events to make it more entertaining and realistic.
- I worked with the team to build/integrate an automated 24/7 live support system for users.
- Created scalable and user-friendly solutions using technologies such as nextJS, redux, typescript, nodeJS etc.

### Frontend Engineer

Agape, Lagos. May 2018 – Mar. 2019

- Collaborated with developers from different parts of the world to assist them fix bugs and complete coding tasks/challenges.
- Mentored and provided guidance for new and aspiring web developers.
- Participated in developer-oriented social events to network with peers from across the world, share insights on how to improve the user experience, and learn about the latest trends in Web development.
